Hardware HPLC - SHIMADZU Prominence-i
Method SHIMADZU - HPLC - High Resolution

(1) Limit of Detection

(2) The total THC/CBD/CBG/Others potential is calculated according to the formula below and takes into account losses during the decarboxylation step :
TOTAL THC = THC+ (THCa x 0.877) and TOTAL CBD = CBD+ (CBDa x 0.877)

(3) Secure copy of your certificate on our server
